

Space Dream

As my rocket flies past *Mars*
I could see all the stars Shiny and bright there were
thousands of them
flying around I counted them, then,
As I flew past the sun I saw a planet blue and green
were I live with you and all the other human beings,

I woke up with a start, I had the best dream of all,
The phone rings, I got a call, I was going to space
That was all.
